EDUCATION

B.S.

Mathematics and Economics
Rutgers University

📅 2011 - 2015

📍 New Brunswick, NJ

SKILLS

- SQL (Redshift, MySQL, Postgres)
- Git
- Python (NumPy, Pandas, Scikit-learn, Keras, Flask)
- Team coaching and development
- Customer Segmentation

PROFESSIONAL SUMMARY

Strategic analytics manager with a proven ability to uncover product and marketing opportunities that drove \$2M in incremental revenue. Experienced in leading analysts, influencing cross-functional decision-making, and building scalable insight frameworks that connect customer behavior, business performance, and growth strategy within fintech.

WORK EXPERIENCE

Analytics Manager

Betterment

📅 March 2023 - current

📍 New York, NY

- Queried acquisition and policy-conversion data in MySQL to uncover channel inefficiencies that ***lifted qualified lead-to-application flow by 6.4%***.
- Refined lifecycle and retention datasets using Pandas to enhance forecasting accuracy for product launches and customer retention strategies.
- Versioned recurring reporting logic in Git, which reduced handoff friction across analysts and cut revision cycles by 3.7 points.

Senior Data Analyst

Stripe

📅 May 2019 - February 2023

📍 New York, NY

- Analyzed merchant and payment trends in Postgres to identify onboarding drop-off points, optimizing marketing strategies for increased engagement in priority segments.
- Engineered forecasting inputs with NumPy, ***improving planning precision*** for transaction-volume scenarios tied to \$1.84M in projected opportunity.
- Developed propensity models using Scikit-learn to prioritize customer engagement strategies for 42,613 accounts based on predicted outcomes.

Data Analyst

HavenLife

📅 April 2016 - April 2019

📍 Washington D.C.

- Directed product and growth analytics in Redshift, optimizing analytics strategies to prioritize customer funding, retention, and revenue growth, resulting in a ***12% increase in targeted funding*** channels.
- Scaled model experimentation with Keras, enabling the team to test recommendation and personalization ideas in 8.6 days on average.
- Coached a team of 5 junior analysts in developing analytical frameworks, achieving accurate product attribution models and strategic lifecycle investment plans.
