WORK EXPERIENCE

Healthcare Data Analyst

United Healthcare Group

📅 January 2026 - current 📍 San Antonio, TX

- Audited claims workflows in Trizetto, catching adjudication gaps that **lifted first-pass accuracy by 6.8%**.
- Reframed utilization findings into leader-ready takeaways, trimming monthly reporting prep by 13 hours.
- Analyzed and resolved complex denial patterns in benefit, diagnosis, and reimbursement layers, streamlining processing for 182,417 member records.
- Briefed care management partners on cost and access shifts, earning a 4.6/5 delivery rating from internal stakeholders.

Junior Healthcare Data Analyst

Christus Health

📅 March 2024 - December 2025 📍 Irving, TX

- Analyzed charge patterns using Current Procedural Terminology (CPT) data to identify and correct 18% of billing errors in orthopedic and cardiology departments.
- Launched a Sisense view for revenue cycle teams that **shortened exception-resolution time by 9 days**.
- Analyzed denial and reimbursement trends to identify \$204K in potential savings, leading to updates in reimbursement policies.

Healthcare Data Analyst Intern

Cigna

📅 September 2023 - Feb 2024 📍 Plano, TX

- Tested early utilization-risk signals in PyTorch, **contributing to \$41.2K** in projected avoidable claim expense insight.
- Segmented member populations in RapidMiner to focus on 3 high-risk groups for targeted interventions, improving review efficiency by 21%.
- Documented validation procedures and source logic, securing second-round audit approval by verifying compliance with data governance standards.

EDUCATION

B.S.

Health Care Informatics

University of Texas

📅 2018 - 2022

📍 Austin, TX

SKILLS

- Trizetto
- Current Procedural Terminology (CPT)
- PyTorch
- Sisense
- RapidMiner
- Structured problem-solving
- Patient-data confidentiality awareness

CERTIFICATIONS

- Certified Health Data Analyst (CHDA)
- Certified Analytics Professional (CAP)
